Dr. Dennis Long  
4902 Tacoma Mall Blvd.  
Tacoma, WA 98409

Dear Dr. Dennis:

When I was in your office a little over a year ago, I was reading some literature on bedwetting. I had no idea that chiropractic treatment could help. Justin, then age 9, had been wetting the bed for several years. We thought it was because of the birth of his sister, and that he was just reverting back, like some kids do. Everyone kept telling us that he would outgrow it. Well I truly believe had I not brought him in to be seen that he would still have this problem today.

Justin is now at the age of sleepovers and what your peers say counts. He wouldn't spend the night anywhere except Grandma's house. And talk about stress for me. Having to deal with wet sheets daily. We had tried everything short of drugs. Almost immediately after he began his treatments we noticed a difference. It has been almost a year and I can honestly say that I only remember one accident since he has finished his treatment.

Justin's self-esteem and self-confidence have been restored. It's such a nice feeling for him to be able to go to his friend's homes and actually be able to sleep over!!! Justin, myself, and the rest of our family thank you!!!

Sincerely,

Melissa Blessum
