

I am writing this today to say thank you to R.C.C. for treating me since November of 2007.

My daughter recommended me to R.C.C. to see if the clinic could help me with my MS (Multiple Sclerosis). She is a patient here at R.C.C. seeing Dr. Doug, Dr. Kolter, and Dr. Mike. She was referred to R.C.C. by a co-worker.

I was diagnosed with MS in 1978. My senior year of in high school, I was 18 yrs. old. It hit me hard and I was wheel chair bound at first but was able to regain some of my mobility. Eighteen months later I then got married and after a year or so we had our first child. While I was pregnant I had a couple of exacerbations (bouts with MS). Not really thinking about what it was, we went to our chiropractor, he adjusted me, and I'd leave, not really knowing what just happened. Just knowing I would feel better soon.

Everything was going well with no exacerbations until I got pregnant the second time, that's when I had another attack. Again I went to the chiropractor and again I felt better, again not realizing what effects the chiropractic adjustments had on me and what my body was really telling me. I started to see a chiropractor on a regular basis, but at no time did anyone sit me down and evaluate me or even suggest some type of plan to keep my MS under control. No one ever looked at my posture to see if that may be contributing to some of my balance issues. They just had me coming in on some type of regular basis and do what my husband calls generic adjustments and not really evaluating me to see where I needed to be adjusted, just adjusting me everywhere.

The Dr.'s at R.C.C. evaluated me and developed a treatment plan to help me regain my balance and developed a maintenance plan to help me maintain my current state of health. They check me out each time I visit and tailor my adjustments to my needs.

Since seeing the Dr.'s at R.C.C. I have more stability while walking, I see improvements in my balance and my overall health has improved.

I would recommend R.C.C. to anyone that has MS or to anyone just tired of the generic chiropractic adjustments and who wants to have a treatment plan developed to their needs.
